Profile

Front-end developer from Ukraine currently based in Sweden. I have knowledges in JavaScript, HTML, CSS and React.js. Also have a background in software testing and Web-site administration. Looking for entry level position to get an exciting opportunity to showcase all of my skills and grow professionally

Tech projects

- On-line dictionary app
(React.js, CSS, HTML, API, Bootstrap, responsive design)
The app shows meanings, phonetics and synonyms of English words. It use free Dictionary API for word searching and free API of images collection to show photos for searching word
- On-line weather app
(React.js, CSS, HTML, API, Bootstrap, responsive design)
The app shows weather conditions in any part of the world in present moment and 5 days weather forecast. Use API technology from OpenWeather and free Animated weather icons
- Portfolio web app
(CSS, HTML, Bootstrap, responsive design)
A multi-page web site displaying information about me and my projects
- On-line weather app
(Vanilla JavaScript, CSS, HTML, API, Bootstrap)
The app shows weather in current location or in any part of the world in present moment. Contains 6 days weather forecast. Convert temperature degree from Celsius to Fahrenheit and back. Use OpenWeather API
